NOVELTIES FOR SPRING AND FALL OF 1900

AND

CONDENSED PRICE-LIST

OF

READING NURSERY.

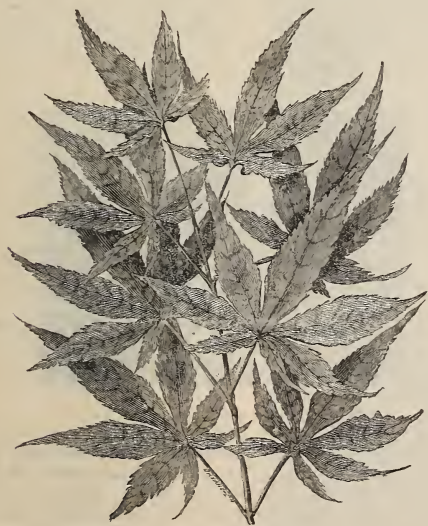

Established in 1854.

JACOB W. MANNING, *Proprietor.*

This is the fifty-fourth year of constant application in the Nursery business, and the forty-sixth year as proprietor of the "Reading Nursery."

TREES.

Purple-leaved Japanese Maple (*Acer polymorphum* var. *atropurpureum*). This is one of the most striking of all the low-growing Maples, it being a small-sized tree, not growing over 6 ft. in height. Its foliage is very deeply lobed and of a very dark blood-red color when coming into leaf in

Purple-leaved Japanese Maple.

the spring. As the foliage grows older it changes to a very much brighter color, holding this shade up until frost. The tree is very globular in its habit of growth, and is excellent for lawn planting. This tree after becoming well established is perfectly hardy and stands our winter without becoming in any way injured. Price, 1-2 ft., \$1.50; 2-3 ft., \$3.00.

Cut-leaved Purple Japanese Maple (*Acer polymorphum* var. *dissectum atropurpureum*). This is one of the most beautiful of all the Japanese Maples. The foliage is very deeply and finely cut, having a decided fern-like appearance. The color of the

foliage is the same as the preceding Maple and holds its color equally as well. Another interesting feature about this Maple is that it has a decided weeping appearance, although it is not by any means a weeping tree. This tree is also dwarf-growing, and is the most desirable of the dwarf-growing trees. Price, 1-2 ft., \$1.50.

Red-flowering Horse Chestnut (*Aesculus Hippocastaneum* var. *rubicunda*). This tree is a variety of our common Horse Chestnut, although it is not so vigorous in its habit of growth, making a very much smaller tree. The leaves of this tree are bright green. It blossoms a week or so earlier than the common Horse Chestnut, and the flowers are a very showy red. It is one of the most desirable of the summer-flowering trees. Price, 4-5 ft., \$1.00.

Koelreuteria paniculata. This is one of the hardy trees from the north of China, introduced into England somewhere in the early part of the eighteenth century, and has been a long time in culture in the United States, although it is not generally known. The foliage of this tree is more or less cut, which gives it a decided feathery appearance. The leaves are of a yellow tinge, which makes quite a contrast to the other foliage trees. The flowers are borne on long spikes at the end of the branch, and are of a bright golden-yellow. This tree while young has not a very regular habit of growth, but as it grows older it becomes more uniform, and makes a pretty lawn tree. Price, 5-7 ft., \$1.00.

Tulip Tree (*Liriodendron tulipifera*). This is a much taller growing tree than any we have mentioned. Of course everybody is more or less acquainted with this tree. It is a forest tree native from southern Connecticut to all south of New York. It is particularly hardy here in the north. The tree is very regular in its habit of growth, and its leaves are truncate in shape. The flowers are borne in the month of June, and are of the size and form of tulips. They are of a greenish-yellow. This is one of the most desirable lawn trees. Price, 6-8 ft., \$1.00.

Stag-horn Sumac (*Rhus typhina* var. *laciniata*). This is one of the newest and most recent introductions of the Sumac family.

The original tree was found by Mr. Manning some years ago. (See illustration on page 2.)

This tree grows about 8 or 10 ft. in height, and is one of the most unique of all of our cut-leaved trees. The foliage is very finely cut and is decidedly fern-like in appearance. Its autumn coloring is of the brightest of hues, and is one of the most pleasing trees to have on your lawn. This tree has an advantage over many trees, viz., that it will do quite well in very light and barren soils. The branches of the tree are covered with a thick hairy substance which gives it a very unique appearance in the winter. Price \$2.00.

Tiger Tail Spruce (*Picea polita*). This is one of the most interesting of the Spruces, being very regular in its habit of growth, with thickly set branches covered with very stiff, curved, sharp-pointed leaves of a deep green. This tree is a native of the island of Nipon and is one of the choicest of evergreens. Price, 2-3 ft., \$2.00.

Koster's Blue Spruce (*Picea pungens* var. *Kosteriana*). Every person who is interested in the Rocky Mountain Blue Spruce should try if possible to give this variety a place on his lawn. There is considerable trouble in getting trees of a high blue color. This tree is imported and derives its name from its introducer. This variety is a grafted

Stag-Horn Sumac.

mon Norway Spruce. A tree averaging 6 ft. in height would spread about 2-3 ft. in width, which makes it very desirable to plant beside walks or in places where you wish to plant a tree that will not take up too much space. We have some very fine specimens which will be both pleasing and ornamental. Price, 3-4 ft., \$1.00; 4-6 ft., \$2.00.

Koster's Blue Spruce.

tree, and the scions are selected from the trees of the highest possible color, and they are the very best-shaped trees that a person can buy. No person having a nice place should be without one or two specimens of this variety. Price, 2½ feet, perfect in shape and color, \$5.00.

Swiss Stone Pine (*Pinus Cembra*). This is one of the most desirable of all the Pines, growing very much after the style of our common White Pine, although it is much denser and smaller in its habit of growth. The color of the foliage and the length of the needles are very similar to our Common White Pine. It is a very desirable lawn tree. Specimens 1-2 ft., 75 cents; 3-4 ft., \$2.00.

Pyramidal Norway Spruce (*Picea excelsa*). People having a limited space and desirous of a rapid-growing tree will by no means be disappointed in buying this tree. Its foliage is much like our com-

Swiss Stone Pine.

Thread-branched Japanese Cypress (*Retinospora filifera*). This is one of the prettiest and most ornamental of the Japanese Cypress. The smaller branches having such a thread-like appearance gives the whole tree a most pleasing and interesting effect. Specimens, price, 2 ft., \$1.00; 3-4 ft., \$3.00.

SHRUBS.

Aralia pentaphylla (*Acanthopanax spinosa*). This is a very upright-growing shrub, suitable for individual planting or planting among other trees. The foliage is of a very bright glossy green; and the long slender branches are of a very light gray color with more or less spines. The flowers on this plant are inconspicuous. It is only desired on account of its bright, glossy colored foliage. Price, 3-4 ft., 50 cents.

Golden-barked Cornel (*Cornus stolonifera* var. *aurea*). This plant is entirely different from any of the cornels that are now in cultivation. The bark, instead of being the brilliant red color of most of the cornels, is of a bright yellow. The flowers are white, borne at the end of the branches, and are in flat cymes. This plant would be very desirable for massing purposes where a person desires a winter effect of its bark. This could be also used together

with the other varieties of cornels. On account of its bright yellow color it makes a very striking contrast. It is also a very good individual plant. Price, \$1.00.

Corked-barked Spindle Tree (*Euonymus alatus*). This is a very rare Japanese shrub growing about 6 ft. in height. All of its branches are covered with a very prominent corky bark which gives it a very interesting effect. It is very pleasing in the fall on account of the brilliant crimson coloring of its leaves. A person enjoying high-colored autumn foliage will be more than pleased with this shrub. Price, 2-3 ft., \$1.00.

Lemoine's Syringa (*Philadelphus Lemoinii*). It is one of the new Syringas being introduced into this country from France. It is very upright in its habit of growth. It is covered with small, yellow-white flowers, which envelop the entire plant. They are very fragrant. Price, 50 cents.

Cut-leaved Golden Elder (*Sambucus racemosus* var. *plumosa foliis aurea*). This is one of the new acquisitions of the Elder family. The foliage is very finely cut, and its color is somewhat similar to the

common Golden Elder. The cut-leaved foliage gives it a decided feathery and pleasing effect. Price, \$1.00.

Viburnum plicatum tomentosum. This is a fertile specimen of the Japanese Snowball. *Viburnum plicatum* is the same relation to the Japanese Snowball that the High Bush Cranberry (*Viburnum opulis*) is to the Guelder Rose (*Viburnum opulis* var. *sterilis*). This plant has very showy white flowers, borne in flat cymes during May and early part of June. Its foliage is of a dark olive-green and it has brownish branches. It makes a very beautiful lawn plant, being very regular in its habit of growth. Price, 18 in., 50 cents; 2 ft., 50 cents; 2½-3 ft., \$1.00.

Catesby's Andromeda (*Leucothoe Catesbii*). This is a very rare and very pretty American plant belonging to the same family that the Lily of the Valley belongs to. It is somewhat spreading in its habit of growth, and its foliage has a decided showy appearance. The flowers are very large and are borne on long spikes in the axils of the leaves. This is a very desirable plant, being used in shady places and on wet dark land. Price, 12 in., 35 cents; 18 in., 50 cents.

VINES.

In making out this list of Vines, we are not offering to our clients any that are decidedly new; in fact, all of them are old introductions, although they are among the most desirable that we have to-day. We have tried to offer to you plants that will give you most satisfactory effects in flower results and vines that will also give you satisfaction as cover plants.

Dutchman's Pipe (*Aristolochia Sipho*). A person desiring a very rapid-growing vine, also a vine to use for covering a porch, piazza, etc., will make no mistake in purchasing this plant. This vine's foliage is very pretty, growing from 6 to 8 in. in diameter. It is of a dark, rich-green color. The flowers on this plant are inconspicuous and are only suitable to be used on a porch or trellis, which you wish to cover quickly. Price, 50 cents; extra strong, \$1.00.

Clematis Paniculata. This is to-day one of the best and most satisfactory of all the Clematis. It is of rapid growth. The leaves are of a light-green color. The most desirable feature of this plant is its numerous white flowers, which are borne in the month of September. The flowers are very prolific. It is a very desirable plant. Price, 50 cents.

Hall's Honeysuckle (*Lonicera brachypoda Halliana*). This is also a very desirable flowering vine, being in bloom all summer long. The flowers are white and yellow and borne very profusely. It is a very rapid grower and retains its foliage very late into the winter; in fact, being very nearly an ever-

Clematis Paniculata.

green. The flowers are very fragrant. Price, 35 cents.

Common Woodbine (*Ampelopsis quinquefolia*). This is the Common Woodbine or Virginia Creeper, and is very desirable to use in barren places or to grow on old trees or over stone walls. It is very hardy and tenacious in its habit of growth. Its foli-

age is very brilliant in its color. Extra-sized plants, 50 cents; ordinary-sized plants, 25 cents.

Crimson Rambler Rose. As this plant is too well known for us to make any special reference to,

HERBACEOUS

Among this class of plants we have no doubt one of the largest collections in New England, if not in the United States, having made this cultivation for more than twenty years.

Among the new introductions of these plants that have been put upon the market within the last few years is the well-known plant:

Golden Glow (*Rudbeckia laciniata* var. fl. pl.). It is a fall-blooming plant, growing to the height of 6-8 ft., and in very rich cultivation often higher. The foliage of this plant is of a light green and very deeply lobed, giving a very pleasing effect in its appearance. The flowers are about the size of a small orange, borne on long stems, which make them very suitable for cutting purposes. We can give you very large clumps or ordinary-sized plants. Clumps, 50 cents; ordinary-sized plants, 25 cents.

Alleghany Hollyhocks. Perhaps one of the most interesting of the newer introductions is the new fringed perpetual-blooming Alleghany Hollyhock. This is a novelty in the race of Hollyhocks, being a decided improvement in all respects over the old varieties. The flowers of the common Hollyhock do not average more than 3 in. in diameter, while in this new class of Hollyhocks they are seldom less than 5 in. in diameter, and quite often 7 in. In the old-styled Hollyhock there is as a general thing but one bud formed at the base of the leaves, while in this variety there are one or two buds formed at the base of the leaves, and as they develop and then fade away new buds form in rotation, making it perpetual in bloom from July until cut off by the frost. Price, 35 cents; \$3.00 per dozen.

London Pride

(*Lychnis chalcidonica*). This is also one of the older varieties of Perennials, although it is very hard to find anything that is more desirable or that is any better for cutting purposes. It is a very profuse bloomer, blossoming from July until September, and growing 2-3 ft. in height, dark red in color. Price, 20 cents.

Asters. Among this class of fall-blooming plants we have quite a large collection.

New England Aster. 6-8 ft. in height; very showy purple flowers. Blossoming from August until November. Price, 15 cents.

Rosea Plena. This is a variety of the New England Aster, which is really the more desirable of the two, grows about the same height, but the flowers instead of being very dark purple are a very showy pink. This is really the only pink aster. Price, 25 cents.

Aster Nova Belgica (var. *Lady Trevellyn*). This is also another variety of our American Asters. Grows about 4 ft. in height. The foliage is very broad, inclined to be lanceolate, and is of a showy olive-green. It has perhaps as rich an appearing foliage as any aster we have in stock. The flowers are borne on immense heads and are pure white with brilliant yellow centres. This is a very interesting aster and at the same time very pleasing. Price, 25 cents.

we will simply state that we have some very fine plants that we will be willing to offer for 50 cents. We also have the Memorial Rose, and other varieties of climbing roses.

PERENNIALS.

Double Mexican Sunflower (*Helianthus multiflorus* fl. pl.). This is one of the most desirable of our fall-flowering Sunflowers. Grows about 6 ft. in height. Deep yellow flowers envelop the whole plant with profusion. The flowers are from 3-4 in. in diameter, with a very prominent row of guard petals. This plant makes a very compact shrubby clump and is very effective. Price, 25 cents.

OLD-FASHIONED GARDEN PINK.

(*Dianthus plumarius*.)

This is a very interesting plant, which everybody is well acquainted with; it being the old-fashioned Garden Pink that is so common among the old New England homesteads. We have among this class of plants very showy varieties, some of them being the following:

Her Majesty. Pure white. Very double with an exquisite fragrance and blossoms all summer long until hard frost. Price, 25 cents.

Essex Witch. This is a very fine pink variety equally as good a bloomer as Her Majesty. Price, 20 cents.

Emperor. Rich crimson, clove-scented, and very fragrant. Price, 20 cents.

PAEONIA.

Under this class of Herbaceous Perennials we find one of the most satisfactory plants of the list, which grows to be a very nice clump, flowering very profusely and giving you at the same time a very large range of color. It is a plant that is very valuable, as it can be used along the edge of shrubs. It is also very effective in large beds, and at the same time is very satisfactory when planted single and allowed to increase year after year, making a very large clump. Among the most interesting and pleasing varieties we have the following:

Canarie. White, with brilliant yellow centre. Price, 75 cents.

Compte de Jussier. Rich pink, with yellow centre. Price, 50 cents.

Festiva Maxima. Pure white, flashed with purple. Price, 50 cents.

Lady Lenora Bramwell. Silvery rose. Price, 50 cents.

Among the early blooming varieties we have the following:

Officialis Rubra Plena. Very double. Brilliant crimson. This is the most prolific Pæonia of the entire list. Early in blossom. Price, 50 cts.

Tenuifolia (fl. pl.). Crimson flowers. This Pæonia is different from any on the list. Its foliage is very finely cut and it is a dwarf-growing plant. It blossoms a little earlier than Officialis Rubra Plena. \$1.00.

Tree Pæonies. Under this list of Pæonies we have

Tree Pæonies.

quite a large collection of plants, which originally were bought as named varieties, but unfortunately the labels have become disturbed, and we cannot sell them with any certainty as to their true names, but we

are quite certain that among them are some of the finest colors that can be obtained. The plants are in first-class condition to give good flowering results. Mixed varieties. Price, 50 cents.

We would like to say that outside of this list of perennials that we have already given you we have quite a large collection of Iris, both the German and Japanese, Phlox, Spiraea, and all of the other leading varieties of Herbaceous Perennials.

FRUITS.

Bismarck Appie. This is one of the new introductions in the fruit line, being very popular, owing to its extreme earliness of fruiting. It is a dwarf-growing tree. We have 2-3 ft. trees full of bloom buds. It is proper to plant in gardens 4-6 ft. apart, and receive a good crop within a very short period. It is an excellent variety to be used in pot culture, trees often 2-3 years old from bud bearing quite successfully. Price, 50 cents.

Ben Davis. This is one of the most reliable shipping apples that we have to-day. It being very popular among exporters on account of its not rotting as easily as most varieties when bruised. It grows well in all parts of the country and is one of the most profitable for the market. It is a large, roundish apple, striped red and yellow, and an early bearer. Its flesh is tender, and has a mild, sub-acid flavor. An early and abundant bearer. Price, 50 cents.

McIntosh Red. A person liking a highly-colored apple will not be disappointed in this variety. It is a flat, medium-size apple with a very brilliant red color. Price, 50 cents.

PEARS.

Josephine de Malines. Medium to large, roundish pear. Its flesh rose-colored and delicately perfumed. The tree is of a regular growth, having small leaves. It is a good, long-keeping table pear, very desirable. It is also a late winter pear. Price, 75 cents.

Colonel Wilder. This is one of the most recent introductions; and is also one of the longest-keeping pears that we have. It is quite large, oblong, inclined to oval. The color is yellow, dotted with russet. The flesh is very juicy and sweet. This pear will keep until about the month of March. Price, 75 cents.

PLUMS.

There has been in the last few years quite an improvement in the cultivation of plums. One of the most important classes of plums having lately been put upon the market is the Japanese varieties being introduced by Mr. Luther Burbank, of California. Mr. Burbank has been the most successful introducer of some of the leading varieties of this class of plums. These plums are undoubtedly desired on account of their vigorous qualities, their early bearing, and their being free from curculio, black-knot, and other damaging diseases of the plums. The most important varieties are

Abundance. Fruit large; amber turning to a rich, bright cherry. Flesh light yellow and very sweet. This is one of the most productive of our entire list of plums. Price, 75 cents.

Wickson. One of Mr. Burbank's Hybrids and considered by him one of his finest productions. Very large, color carmine, with a white bloom. Flesh very sweet. It has a remarkably small stone. It is also an excellent long-keeping variety. Price, 75 cents.

Red June. An early variety. Medium size and of a pure red color. Flesh is sweet. Excellent quality. Price, 75 cents.

PEACHES.

Crosby. This is to-day the most successful peach of the entire list that is on the market. Its bearing qualities are excellent and it is a sure cropper when all other varieties have failed. It is not quite as large as Crawford's Early, but comes in about the same time. The color is orange, slightly dotted with crimson. Flesh is bright yellow and very juicy. Price, 35 cents.

Alberta. This is one of the finest of the new introductions. Very hardy variety and is adapted to almost any soil. Flesh yellow, juicy, and of a fine flavor. Ripening a little later than Crawford's Early. Price, 35 cents.

Champion. This is also a new early variety. Large size and creamy-white in color, with a red cheek. Its flavor is very sweet, and it is an excellent shipper. Price, 35 cents.

GRAPE.

Among the newer introductions of grapes we have **Campbell's Early.** This grape was put on the market a few years ago by the originator of the Delaware grape. We all know what the Delaware grape is as to its quality and flavor, it being considered by many horticulturists as the standard of excellence. This grape is very highly flavored and has a good tough skin. Is considered a fine keeper and best market grape that we have. Price, 50 cents.

McPike. This is also a new introduction. It is a black variety and is considered a very desirable grape. It is a seedling of the Worden, and it is known to many horticulturists as a far superior grape to the Worden. Price, \$1.50.

CURRANTS.

President Wilder. A new red currant. Fruit large, fine flavor, and a great yielder. For making jelly this is considered the best currant there is grown. Keeping the longest and having a fine color, it is the best on the market to-day. Price, 24 cents; \$2.00 per dozen.

BLACKBERRY.

Iceberg. This is one of the latest introductions in the way of blackberries, being introduced by Mr. Luther Burbank, and is a white blackberry. This is considered a very hardy berry, standing a temperature of 18 to 20 degrees and coming out all right. It is a very early berry, ripening as early as the first week in July. This blackberry when not fully ripened is slightly bitter, although when fully ripened the flavor is very sweet and pleasing, there being no hard core to the berries. It has a great profusion of berries, being borne in large clusters. Price, 20 cents each; \$2.00 per dozen.

RASPBERRY.

Cumberland. A new black-cap of the highest quality. Fruit very large. Very productive. Quality excellent. Price, 20 cents each; \$2.00 per dozen.

FRUITS.

See our ILLUSTRATED DESCRIPTIVE CATALOGUE of 100 pages for full descriptions of and cultural directions for the two hundred or more varieties of Hardy Large and Small Fruits that we offer.

See Novelty List for the latest introductions.

APPLES.

	Each.	Doz.
Standard trees, 4 to 6 ft., \$12.50 per 100 ..	\$0 25	\$2 50
“ “ 6 to 8 ft.....	50	4 00

Heavy trees of bearing size can often be supplied.

Summer varieties: Early Harvest, Oldenburg (Duchess), Red Astrachan, Summer Pippin, Sweet Bough, William's Favorite, Yellow Transparent, etc.

Autumn varieties: Fall Pippin, Gravenstein, Maiden's Blush, Porter, Twenty Ounce, Wealthy, etc.

Winter varieties: Baldwin, Fameuse, Hubbardston, King, Northern Spy, R.I. Greening, Roxbury Russet, etc., etc.

Newer varieties: Sutton's Beauty, Wolfe River, Mackintosh Red, Hurlburt, etc..... 50

Dwarf trees, on Paradise stock 50 4 00

In such sorts as can be supplied.

CRAB APPLES.

Dartmouth, Hyslop, Red and Yellow Siberian, Transcendent, Whitney, etc., at prices quoted for Standard Apple Trees.

PEARS.

Standard Trees as listed unless specially quoted.

Two and three years from bud 75 6 00

Three to five years from bud 1 00 10 00

Older trees in many varieties, many in bearing condition, at \$2.00 each, and upwards.

Summer varieties: Bartlett, Clapp's Favorite, Rostetzer, etc.

Autumn varieties: Angouleme (Duchess), Buerre Bosc, Buffum, B. Hardy, Seckel, Sheldon, Urbaniste, etc.

Winter varieties: Anjou, Dana's Hovey, Lawrence, Vicar, Winter Nelis, etc.

Newer varieties: Idaho, Vermont Beauty, Wilder Early, etc. 1 00 10 00

Dwarf trees, in the leading dwarf varieties.

Two-year from bud 50 4 00

PLUMS. Price, unless specially quoted:

Two and three years from bud..... 75 6 00

Three and five years from bud..... 1 00 10 00

Bradshaw, Coe's Golden Drop, Damson, Green Gage, Imperial Gage, Jefferson, Lombard, Pond's Seedling, Washington, Yellow Egg, etc.

Heavy bearing-size trees in some sorts.

Lincoln. Vigorous and prolific; reddish-purple 1 00

Grand Duke, late, dark-violet; prolific sort.. 75

Japanese varieties: Satsuma, Botan, Burbank, etc. A fine new class of very early and exceedingly abundant bearers of fruit of the largest size and highest quality. Light trees, 50 cents each; heavy..... 1 00

CHERRIES. Price, unless specially quoted:

Standard trees, two and three years..... 75 6 00

Three to five years..... 1 00 10 00

Heavy trees of bearing size at proportionate rates.

Hearts and Biggareaus: Black Heart, Eagle and Tartarian, Coe's Transparent, Governor Wood, Napoleon, Rockport, etc.

CHERRIES.

	Each.	Doz.

Vigorous-growing shade tree. 8 to 10 ft....	75	6 00
Aucuba-leaved (<i>F. A. aucubifolia</i>). Variegated.....	1 00	
European (<i>F. excelsior</i>). Lg. 6 to 8 ft....	50	5 00
Green (<i>F. viridis</i>). Lg. 6 to 8 ft.	50	5 00
ASH, MOUNTAIN (<i>Pyrus Sorbus</i>).		
American (<i>P. S. Americana</i>). Med. Rare. 5 to 7 ft.	50	
European (<i>P. S. acuparia</i>). Med. 6 to 8 ft., Orange fruits in heads. 8 to 10 ft.	1 00	10 00
Oak-leaved (<i>P. S. quercifolia</i>). Med. 6 to 8 ft.	75	7 50
BEAM TREE (<i>Pyrus Sorbus Aria</i>). Sm. Silvery foliage.....	75	
BEECH (<i>Fagus</i>).		
American (<i>F. ferruginea</i>). Lg. 3 to 5 ft....	50	5 00
A choice native. 5 to 7 ft.	1 00	
European (<i>F. sylvatica</i>). Lg. 4 to 6 ft....	50	5 00
Fern-leaved (<i>F. s. heterophylla</i>). Sm.	1 50	
River's Purple-leaved. Med. 4 to 5 ft.	1 50	
Elegant deep purple foliage. 5 to 6 ft.	2 50	
Weeping (<i>F. s. pendula</i>). Lg. 2 to 4 ft....	1 50	
BIRCH (<i>Betula</i>).		
Cane or Paper (<i>B. papyracea</i>). Med. 4 to 6 ft.	75	7 50
Elegant silvery bark with age. 6 to 8 ft.	1 00	
European White (<i>B. alba</i>). Med. 4 to 6 ft., Rapid growth, graceful habit. 6 to 8 ft.	50	5 00

BIRCH

	Each.	Doz.
Cut-leaved Weeping (<i>B. a. laciniata pendula</i>). Med. 4 to 6 ft.	\$1 00	\$10 00
White bark, fern-like foliage, weeping habit. 6 to 8 ft.	1 50	
Red or River (<i>B. nigra</i>). Med. 4 to 6 ft. ..	50	5 00
Ragged, reddish bark. Picturesque. 6 to 8 ft. 1 00		

CATALPA.

	Each.	Doz.
Bunge's (<i>C. Bungeii</i>). Sm. Gftd. Stds....	1 00	
Globular heads of large showy foliage.		
Common (<i>C. bignonioides</i>). Med. 5 to 7 ft..	50	5 00
Showy foliage. Large flowers. 8 to 10 ft. ..	1 00	
Golden (<i>C. b. aurea</i>). Sm. Golden foliage. 4 to 6 ft.	75	
Kaempfer's (<i>C. Kaempferii</i>). Med. 4 to 6 ft.	50	5 00
Very rapid, healthy growth. 6 to 8 ft.	1 00	

CHERRY, FLOWERING (*Cerasus*).

	Each.	Doz.
Double White (<i>C. acium alba pl.</i>). Sm....	50	5 00
Ranunculus (<i>S. caproniana var. multiplex</i>). Sm.....	1 00	
Wpg. Japanese (<i>A. Japonica var. pendula</i>). Sm.....	1 50	
Wpg. Rose-flowered Japanese	1 50	
A beautiful weeping lawn-tree with a wealth of showy pink flowers in May.		
Siebold's. Dbl. White or Dbl. Red. 3 to 5 ft.	50	5 00

CHESTNUT (*Castanea*).

	Each.	Doz.
American Sweet (<i>C. Americana</i>). Lg. 4 to 6 ft.	50	5 00
Fine ornamental, native. 6 to 8 ft.	1 00	10 00

CRAB, FLOWERING (*Pyrus Malus*).

	Each.	Doz.
Hall's Tea Rose C. (<i>P. M. floribunda</i>). Sm. 3 to 4 ft.	50	
Crimson and white in May. 5 to 6 ft.	1 00	10 00
Also known as Parkman's Tea-rose Crab.		
Chinese Dbl. White (<i>P. M. spectabilis</i>). Sm. 3 to 5 ft.	50	
Chinese Dbl. Pink. 3 to 5 ft.	50	

Many new and rare uncatalogued sorts, lists on application.

CYPRESS (*Taxodium*).

	Each.	Doz.
Bald (<i>T. distichum</i>). Med. 3 to 5 ft.	50	5 00

CYPRESS.

Weeping (*Glyptostrobus Chinensis*). Med.
Rare and choice.....\$1 50

DOGWOOD (*Cornus*).

Flowering (*C. florida*). Sm. White. 2 to
4 ft..... 50 \$5 00
Bright scarlet berries all summer. 4 to 5 ft. 75 7 50
Fine autumn foliage. 5 to 7 ft..... 1 00
Pink-flowered (*C. f. var. rubra*). Sm. 1 50
Weeping (*C. f. pendula*). Sm..... 2 00

ELM (*Ulmus*).

American (*U. Americana*). Lg. 6 to 8 ft... 50 4 00
" " 8 to 10 ft... 75 6 00
English (*U. campestris*). Lg. 6 to 8 ft... 75 6 00
Purple-leaved (*U. c. purpurea*). 5 to 7 ft., 1 00
Huntington. Lg. Vigorous form. 6 to 8 ft., 1 00
Scotch (*U. montana*). Lg. 6 to 8 ft..... 50 5 00
Variegated-leaved, 6 to 8 ft..... 1 00
Weeping Camperdown. Sm. 2 to 3 yr.
grafts..... 1 50
Fine weeping lawn-tree. 3 to 5 yr. grafts... 3 00

EUONYMUS or STRAWBERRY TREE.

Common (*E. Europæus*). Sm. 3 to 5 ft.... 50 5 00
Wahoo (*E. atropurpureus*). Sm. 3 to 5 ft., 50 5 00

FRINGE TREE (*Rhus Cotinus*). Sm. 2 to

4 ft..... 50 5 00
Clouds of reddish-purple seeds. 4 to 5 ft.... 1 00

GINKGO (*Salisburia*), or **MAIDEN HAIR TREE.**

Japanese (*G. biloba*). Med. 4 to 6 ft. Odd
foliage..... 1 00 10 00
Picturesque habit, 6 to 8 ft..... 1 50

HAWTHORN (*Crataegus*).

Double White English (*C. oxyantha alba*
pl.) Sm..... 75 7 50
Dbl. Red. Sm. 3 to 5 ft. 75 7 50
Paul's Dbl. Scarlet. Sm. 3 to 5 ft..... 1 00
Scarlet-fruited (*C. coccinea*). Sm. 3 to
5 ft..... 75
Cock's Spur (*C. Crus-galli*). Sm. 3 to 5 ft., 75

HOP TREE (*Ptelea*).

Common (*P. trifoliata*). Sm. 3 to 5 ft.... 50 5 00
Golden (*P. t. aurea*). Elegant golden foliage. 1 00

HORSE CHESTNUT (*Aesculus*).

Common (*A. hippocastaneum*). Lg. 6 to
7 ft..... 1 00 10 00
Elegant foliage, showy flowers. 8 to 10 ft... 1 50
Dwarf (*Pavia macrostachya*). Sm. 2 to 3 ft., 1 00
Red-flowering (*A. rubicunda*). Med. 4
to 6 ft..... 1 00
Ohio Buck-eye (*A. glabra*). Med. 5 to
7 ft..... 50

KENTUCKY COFFEE TREE (*Gymno-*
cladus Canadensis) Med..... 75**KOELREUTERIA paniculata**. Med. 3 to

5 ft. 75
Compound foliage, yellow flowers, 5 to 7 ft. 1 00

LINDEN (*Tilia*).

American or Basswood (*T. Americana*).
Lg. 6 to 8 ft..... 50 5 00
Rapid growth, grayish bark. 8 to 10 ft.... 1 00 10 00
European (*T. Europea*). Lg. 5 to 7 ft.... 50 5 00
Dense dark-green foliage. 8 to 10 ft..... 1 00 10 00
Silver Lime (*T. argentea*). Lg. 5 to 7 ft... 75
Weeping Silver Linden (*T. petiolaris*).
Med. 2 yr. grafts..... 1 00

LARCH (*Larix*) or **Hackmatack.**

American (*L. Americana*). Lg. 4 to 6 ft... 75
European or Scotch (*L. Europea*). Lg. 2
to 4 ft..... 35 3 50
Showy foliage; rapid growth. 4 to 6 ft.... 50 5 00
Japanese (*L. leptolepis*). Lg. 2 yr. grafts, 1 00

LABURNUM or **Golden Chain.**

Scotch (*L. alpinum*). Sm. 3 to 5 ft..... 50 5 00
Drooping clusters of gold. June. 5 to 7 ft. 1 00

LIQUIDAMBER or Sweet Gum.

Styraciflua. Med. Handsome foliage. 4 to
6 ft. \$1 00

LOCUST (*Robinia*).

Yellow (*R. Pseudo-accacia*). Sm. 4 to 6 ft., 50 \$5 00
Besson's. Sm. Upright habit. 4 to 6 ft.... 75
Decaisne's. Sm. Rosy-pink flowers. 4 to
6 ft..... 75
Everblooming. Sm. Pink and red. 3 to 5 ft., 1 00
Clammy (*R. viscosa*). Sm. 4 to 6 ft..... 75 6 00
Honey (*Gleditschia triacanthos*). Lg. 4 to
6 ft. 50 4 00

MAGNOLIA.

Cucumber Tree (*M. acuminata*). Lg. 5
to 7 ft..... 50 5 00
Great-leaved (*M. macrophylla*). Med. 4
to 5 ft..... 1 50
Umbrella Tree (*M. tripetala*). Med. 4 to
6 ft. 1 00
White Bay (*M. glauca*). Sm. 2 to 4 ft... 1 00
White flowers; intensely fragrant. 4 to 6 ft. 2 50

CHINESE AND JAPANESE SORTS.

Showy Chinese (*M. speciosa*). Sm. 2 to
3 ft. 1 50
White, tinged with rose. 3 to 4 ft. 2 50
Soulange's (*M. Soulangeana*). Sm. 2 to 3
ft. 1 50
Creamy white, tinged red. Very hardy. 3
to 4 ft..... 2 50
Trained pyramids, for immediate effect, 5 to
6 ft. 5 00
Lenne's (*M. Lennei*). Sm. 2 to 3 ft..... 1 50
Deepest purple, white throat. Very hardy.
3 to 4 ft..... 2 50
Yulan (*M. conspicua*). Med. 2 to 3 ft.... 1 75
Purest white, fragrant. Very hardy. 3 to 5 ft. 3 00
Hall's Japanese (*M. stellata*). Sm. 1½ to
2 ft. 2 00
Double white, in profusion. Elegant. 2 to 4 ft. 3 50
The Chinese and Japanese Magnolias are
among the finest of small lawn trees, giving
a wonderful profusion of bloom in advance
of the foliage.

MAPLE (*Acer*).

Ash-leaved (*A. Negundo*). Lg. 5 to 7 ft... 50 5 00
Rapid clean growth. 8 to 10 ft..... 1 00 10 00
Ginnala (*A. Ginnala*). Sm. 2 to 4 ft..... 75
Beautiful autumn foliage, 4 to 6 ft..... 1 00 10 00
Japanese (*A. polymorphum*). Sm. 2 to 4 ft., 1 00 10 00
Jap. Blood-red (*A. p. atropurpureum*).
Sm. 1 to 2 ft..... 1 50
Beautiful red foliage all summer. 2 to 3 ft... 3 00
Jap. Weeping Cut-leaved Purple (*A. p.*
a. dissectum). Sm. 1 to 1½ ft..... 1 50
Weeping habit, elegant foliage, 1½ to 3 ft... 2 50
Moose-wood (*A. Pennsylvanicum*). Med.
5 to 7 ft..... 75 7 50
Norway (*A. platanoides*). Lg. 6 to 8 ft... 50 4 00
Strong sturdy habit, 8 to 10 ft..... 75 6 00
Schwerdler's Norway. Lg. 5 to 7 ft.... 75 7 50
Bright red foliage effect, 6 to 8 ft..... 1 00 10 00
Cut-leaved Norway (*A. p. dissectum*).
Med. 4 to 6 ft..... 1 00
Scarlet (*A. rubrum*). Lg. 5 to 7 ft..... 75 6 00
Silver-leaved or White (*A. dasycarpum*).
Lg. 6 to 8 ft. 50 4 00
Rapid growth, silvery foliage, 8 to 10 ft.... 75 6 00
Weir's Wpg. Cut-leaved Silver. Lg. 6
to 8 ft. 75 7 50
Vigorous, handsome foliage. Pendulous.
8 to 10 ft..... 1 00 10 00
Sugar or Rock (*A. saccharinum*). Lg. 6
to 8 ft..... 50 4 00
The standard shade tree. 8 to 10 ft..... 75 6 00

Large Specimen Trees, Shrubs, and Coniferous Evergreens can be supplied in numerous rare and common forms, at prices in proportion to their rarity and individual perfection.

A personal inspection of such stock by persons requiring plants for immediate lawn effect is desirable.

CONIFEROUS EVERGREEN TREES.

Our collection of Coniferous Evergreens has been for many years past, and is at present, the most complete in New England, and one of the finest in America.

For full descriptions of and cultural directions for over one hundred and fifty varieties, a part only of our entire collection, see our ILLUSTRATED DESCRIPTIVE CATALOGUE of 100 pages.

ABBREVIATIONS.—Lg., Trees exceeding 50 feet in height at maturity; Med., Trees 25 to 50 feet at maturity; Sm., Trees 10 to 25 feet; Dwf., Shrubs of low yet upright habit; Crpg., Trailing sorts.

All our Evergreens are carefully transplanted at frequent intervals to insure the best of fibrous roots, and the best results in removal are consequent.

YEW (*Taxus*).

American or Ground Hemlock (<i>T. Canadensis</i>). Spg.	75	7 50
----------------------------------------------------------------	----	------

Dense low habit. For shade or sun. 2 ft.	1 00	
-----------------------------------------------	------	--

English (<i>T. baccata</i>). Dwf. Shelter.	75	
---------------------------------------------------	----	--

Irish (<i>T. b. fastigiata</i>). Sm. Columnar.	75	
-------------------------------------------------------	----	--

Japanese (<i>T. cuspidata</i>). Dwf. 9 to 12 in.	1 25	
---------------------------------------------------------	------	--

Rare. Perfectly hardy. 1 to 1½ ft.	2 00	
-----------------------------------------	------	--

See Descriptive Catalogue of 100 pages for many other sorts in addition to the above.

HARDY HERBACEOUS PERENNIALS.

Of these we have the finest collection in the country, which is fully described in our most complete Illustrated Descriptive Catalogue.

Below we describe those sorts which we can most highly recommend, embracing as they do the cream of our entire collection for free-blooming effect; and all are perfectly hardy, and, once planted, increase in size and blooming effect yearly, and require but one purchase to have for all time.

We have indicated the height to which they commonly attain in the flower-border, as well as their blooming season, to assist in selection.

	Each.	Doz.		Each.	Doz.
ACHILLEA the Pearl. 2 ft. All sum.	\$0 15	\$1 50	IBERIS sempervirens (Hardy Candytuft). 1 ft. Spg. Evergreen. White.	\$ 25	\$2 50

autumnale. 6 to 7 ft. Aut. Immense heads of orange.	20	2 00	SPIRÆA aruncus (Goat's-beard S.). 4 ft. E. sum. Creamy white.	25	2 50
HELIANTHEMUM Rhodanthemum (Sun Rose). 1 ft. Sum. Flesh pink. Evergreen.	35	3 50	filipendula (Drop wort [S.]). 2 ft. E. sum. Fern foliage. White.	20	2 00
HELIANTHUS latiflorus (Semi-double Sun-flower). Sm. 4 ft. Choice.	20	2 00	palmata. 3 ft. Sum. Showy foliage. Crimson spikes. Elegant.	25	2 50
multiflorus var. fl. pl. (Double Mexican Sun-flower). 4 ft. Sum.	20	2 00	STATICE latifolia (Sea Lavender). 2 ft. Sum. Lavender sprays.	25	2 50
Maxmillian's. 7 ft. Aut. Fine late-blooming species.	25	2 50	THYMUS argentea variegata (Silver Thyme). Showy variegation.	20	2 00
HELIOPSIS Pitcheriana (Great Ox-eye). 6 ft. All summer. Yellow.	25	2 50	TROLLIUS European (Globe-flower). 2 ft. Spg. and Aut. Elegant.	25	2 50
HEMEROCALLIS flava (Yellow Day-lily). 3 ft. Sum. Fragrant yellow.	20	2 00	VERONICA amethystina (Speedwell). 18 in. June. Spikes of amethyst.	25	2 50
Thunberg's. 2 ft. Aut. Lemon yellow. Fragrant. Fine.	25	2 50	longifolia var. subsessilis. 2½ ft. Aut. Long blue spikes.	30	3 00
HEUCHERA sanguinea. (Alum-root.) 2 ft. All summer. Spikes of crimson scarlet.	30	3 00	rupestris (Creeping S.). Spg. Evergreen. Clouds of blue.	20	2 00
HIBISCUS CRIMSON EYE. 3 ft. Aut. Immense white and crimson flowers.	30	3 00	VIOLET, Double Russian. Double blue. Intensely fragrant. Hardy.	20	2 00
HOLLYHOCKS in variety. 4 ft. Both double and single sorts.	20	2 00	YUCCA filamentosa (Adam's Needle). 4 ft. July. Cream white.	35	3 50

STREET SHADE TREES.

Of these we have a very fine supply of clean, thrifty transplanted stock, in best possible condition to produce quick results. We invite an inspection of our stock, which will be found to compare favorably with any to be found elsewhere. Special rates given in extra large quantities. In many cases we are able to supply a limited quantity of very extra heavy trees for immediate effect; these trees may vary from 12 to 20 feet high, and from 3 to 8 inches in diameter. Price upon selection.

	Doz.	Hund.
ASH, American. 6 to 8 ft.....	\$4 00	\$25 00
Rapid growth. Select. 8 to 10 ft.....	6 00	40 00

	3-4 ft.	6 00	40 00
	4-6 ft.	9 00	60 00

LANDSCAPE GARDENING.

We have very complete facilities for supplying planting plans for improvements to parks, cemeteries, or private grounds. This department is under the charge of a competent landscape gardener, whose work for several years past has given the best of satisfaction to his clients. Personal visits made to give suggestions and advice, or for the purpose of taking data for the formation of complete planting plans, and, when desirable, the superintendence of the work can be undertaken by him. Charges for services stated upon application.

The saving gained by special rates alone, that can usually be arranged where the entire work of ornamenting a place is undertaken in a systematic and complete manner, often far exceeds the original cost of plans and advice.

Correspondence Solicited.
